Experience

Voyagex AI

Feb 2026 -- Present

Software Engineer Intern

On-site

- Implemented **multilingual** support using **language-based translation** files and dynamic content translation for localized user experiences.
- Improved navigation via **routing and deep linking (URL query params)**, enabling direct access to filtered views.
- Optimized UI performance by reducing unnecessary re-renders, improving responsiveness by **25%**.
- Integrated REST APIs for real-time data synchronization, reducing stale UI states and improving data consistency.

Centennial Infotech

Oct 2025 -- Jan 2026

Full Stack Developer Intern

Remote

- Engineered a **production-ready full-stack system** handling **1000+ records** with optimized data ingestion and querying.
- Designed and implemented **scalable RESTful APIs and secure CRUD operations** with validation and error handling.
- Built a **responsive, mobile-first UI** with optimized routing, state management, and seamless API integration.
- Enhanced performance using **search, filtering, and pagination**, improving large dataset accessibility.

Projects

SayMyTask — AI Voice Reminder System | [React.js](#), [Node.js](#), [Express](#), [MongoDB](#), [Tailwind](#), [ElevenLabs](#) | [Live](#) | [🔗](#)

- Built a **scalable AI voice reminder system** with multilingual **TTS using ElevenLabs**.
- Implemented **JWT auth, Google OAuth, email verification**, and role-based access.
- Designed scheduling workflows capable of processing **500+ reminders/day** using cron jobs and tested APIs.

LostFoundr — Lost & Found Web App | [React.js](#), [Node.js](#), [Express](#), [MongoDB](#), [Tailwind](#), [Cloudinary](#) | [Live](#) | [🔗](#)

- Developed a Lost & Found platform with **secure authentication and Cloudinary** image uploads.
- Implemented **protected routes and user-specific CRUD operations** for secure access control.
- Built optimized **search & filter functionality**, onboarding **150+ test users** for real-world validation.

Virtual Trading Platform — Real-Time Dashboard | [React.js](#), [Node.js](#), [Express](#), [MongoDB](#), [Tailwind](#), [Chart.js](#), [Binance API](#) | [Live](#) | [🔗](#)

- Built a real-time trading simulator capable of processing **1000+ simulated trades/day**.
- Implemented buy/sell logic, wallet tracking, and trade history.
- Developed analytics **dashboard** with live Binance API data using **Chart.js**.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript, C, C++

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Authentication (JWT, OAuth)

Databases: MongoDB, MySQL, Redis

Tools & Technologies: Git, GitHub, Postman, Cloudinary, Vite, Chart.js

Deployment & Testing: Vercel, Render, Jest, Supertest

Education

University of Technology

Bachelor of Computer Applications

July 2026

Jaipur, Rajasthan
